

INDEX

A

Access

- equipment 16.4.3
- responsibility to provide 16.4.2
- tanker/shore 16.4
- unauthorised persons 16.4.7

Accommodation

- air conditioning and ventilation systems 24.2
- closure of openings 24.1

Additives

- Anti-static 11.1.7.9
- Antistatic, Inhibitors, Dyes, H₂S

Adiabatic

- definitions
- compression 27.16; 27.21.2
- curve 27.16
- expansion 27.16

Adjacent berths

- general cargo tankers at 24.9.2
- tankers at 24.9.1

Administration

- definitions
- Legislation 1.2.5
- Setting of exposure limits 2.3.3.2
- Definition of dangerous areas 4.4.2.1

Aerials

- see Antennae, transmitting

Air conditioning

- central 4.1; 11.4.3; 24.2
- window type units 11.4.3; 24.2

Air Draught

- Restrictions on 15.6.4
- Retention of ballast to reduce 11.6.6

Air driven lamps

- precautions for use 4.3.3; 12.5.4

Air flow

- over accommodation block Figure 2.4

AIS

- status during cargo operations 4.8.4

Alarms

- cargo tank overfill 11.1.6.6; 11.1.13.4
- emergency 20.2.3.1
- fire 19.3; 19.4
- gas measurement instruments 2.3.6.4; 8.2.3; 8.2.4; 19.2.9
- pumproom 10.11.6; 10.11.7
- vapour balancing during tanker-to-tanker transfers 7.1.6.4

Alongside

- barges 11.9.2
- tugs 23.3.2
- tugs and other craft 24.9.4
- see also Tugs

Aluminium

- anodes 4.7
- equipment 4.6
- fire protective clothing 19.7

Anchors

- readiness 23.3.1
- securing 23.4.2.5

Anodes

- see Aluminium, Cathodic protection

Antennae, transmitting

- precautions for use 4.8.2.1
- satellite equipment 4.8.2.3

Antistatic additive

- definitions
- use of 11.1.7.9

Approved equipment

- definitions
- alterations to 4.4.4.5
- communications 4.8.1
- fixed electrical 4.4.3
- gas measurement 2.4
- portable electrical 4.3; 12.5.4

Aqueous film forming foam (AFFF)

- use of 5.3.2.1

Area classification

- electrical equipment/installations 4.4
- see also Dangerous area; Hazardous area

Arms

- see Metal cargo arms

Aromatic hydrocarbons

- benzene and others 2.3.5
- see also Benzene

Asbestos

- removal of lagging 4.11
- respiratory hazards 10.2.2

Atmosphere

- cargo tank control 7.1.5
- cargo tank washing and cleaning 11.3.4
- inert 7.1.6; 11.3.4.1
- non-inert 11.3.4.2
- see also Measuring and sampling; Sampling

Auto-ignition

- definitions
- of petroleum liquids 4.10

Automatic Identification System

- see AIS

B

Ballast

- cleaning contaminated spaces 11.3.6.11
- contamination of double hull spaces 11.7
- deballasting in port 11.6.5
- loading into cargo tanks 11.6.3
- operations 11.6
- retention to reduce freeboard 11.6.6.1
- simultaneous cargo/ballast 7.1.6.3; 11.1.14.12
- tank lids 24.5
- valve operations 11.6.3.2
- see also Segregated ballast

Ballast spaces

- monitoring of 7.3.4

Ballast tanks

- over or under pressurisation 7.2.2

Barges

- see Alongside, Boats alongside

Battery equipment

- portable 4.3.4; 4.3.5; 4.3.6

Bearings

- cargo pump, inspection of 10.11.1; 10.11.7

Benzene

- and other aromatic hydrocarbons 2.3.5
- cargo information 2.3.4; 22.4.1.2; 22.4.2.1
- in enclosed spaces 10.2.4.1
- toxicity 2.3.5.2

Berthing

- exchange of information 22.3
- fender operating limits for 17.2

Berths

- mooring at 9.8.5; 16.2; 23.4
- vehicle access to 24.13
- see also Adjacent berths; Jetty

Bilges

- pumproom, alarm 10.11.7
- pumproom, cleanliness of 10.11.3

BLEVE

definition 27.22;
vapour burn 30.1.1

Boats alongside

during an emergency 9.9.3.1
during cargo operations 24.9.4
during tank cleaning 11.3.3.2
- see also Tugs

Boil-off

- definitions
cargo 32.5.2; 32.6; 33.3.2
compressed, condensed, returned to the tank 31.5.2
control 31.5
flash-gas 32.7.2
heat flow 32.7.2; 33.3.2
insulation boxes 33.2.2
LNG storage tanks 27.2.1
loading 31.5
rates 27.18.1
reliquefaction 31.1.1
semi-pressurised cargo of propane 27.21.2
tank pressures 32.7.2
vapours 27.13; 27.21.1; 27.21.2; 31.5;
31.5.2; 32.4

Boiling Point

- definitions
atmospheric pressure 27.1; 27.2.1; 27.12.1
BLEVE 27.22
cargo 32.5.3; 33.1
ethane 27.19
ethylene 33.3.1
in (M)SDS 20.1
liquefied gas 27.12.2; 27.15
liquid mixture 27.19
LNG 27.2.1; 33.1; 33.3.1
loading heated cargo 11.1.11
Net Positive Suction Head (NPSH)
requirement 31.2
of compounds 1.1.1
pressure 27.17; 32.5.3
propane 33.1; 33.3.1
special boiling point solvents 2.3.5.1
temperature limitations 33.3.1
values 27.18.1
vapour 27.15, 27.22
vinyl chloride 27.2.4

Bonding

- definitions
in terminal 17.6
tanker/shore cable/wire 17.5.2; 17.5.4 static
electricity Chapter 3
tank cleaning hoses 11.3.6.1; 11.3.6.2

Booster Pump

- definitions
cargo tank pumps 31.2; 32.7.3; Figure
32.13
cavitate 32.7.4
centrifugal type 31.2; 32.7.2
deck-mounted 31.2
discharging 32.7; 32.7.2
fully pressurised tankers 31.2
heater 32.7.3
in-line equipment fitted to terminal pipeline
systems 32.5.3
pressure increase 32.5.3
reduce the pressure 32.7.2
suction 32.7.3
throttling 32.7.2
vertical, horizontal Figure 31.8; 31.9
weatherproof covering 31.8

Breathing apparatus

air line 10.8.2
cartridge/canister face masks 10.8.4
emergency escape breathing device 10.3;
10.8.3; 10.11.7
hose mask (fresh air) 10.8.5
maintenance 10.8.6
readiness for enclosed space entry 10.5
self-contained 10.8.1
stowage 10.8.7
training 10.8.8

Bulk Cargo

- definitions

Bunkering

operations Chapter 25
procedures 25.2
safety check-list 25.4

Bunkers

checking of headspace for flammability 4.1
hazards associated with 2.7
information exchange 22.2.3; 22.4.1
- see also Residual fuel oil

Butane

calibration of flammable gas monitors
2.4.3.4
Explosive Limits of 1.2.2 Table 1.1;

Butterfly valves

pressure surge 11.1.5
see also Valves

C

Cables

ship/shore bonding 17.5.2; 17.5.4
- see also Wandering leads

Cannons

- see Monitors

Cans

petroleum in 12.5
- see also Drums

Carbamates

- definitions
ammonia 27.7; 32.2.3; 32.9.5
carbon dioxide 27.7; 32.9.5
cargo contamination 27.7

Carbon dioxide

as product of inert gas 7.1.3
electrostatic hazard 3.3.6
fire-fighting 5.3.2.2; 19.5.2
flooding 8.1.3.1
use as span gas 2.4.10.1

Carbon monoxide

as product of inert gas 7.1.3

Carcinogen

- definitions
permanent damage 28.3.1
vinyl chloride 28.3.1

Cargo

deck 12.5.8

distribution 22.5; 22.6
handling Chapter 7, Chapter 11;
Chapter 24; 26.3
information 22.2.4; 22.4.2
leakage into ballast spaces 11.3.6.11; 11.7
MSDS 2.3.4; 20.1
operations, not always afloat 16.7
operations, over the tide 16.6
packaged 12.5
pipeline draining 10.11.2
tank lids 24.3.1
toxicity 2.3
- see also Discharging; Hoses; Loading;
Manifolds; Measuring and sampling;
Metal cargo arms; Pipelines; Pumps;
Tank; Valves

Cargo Area

- definitions

Cargo arms

- see Metal cargo arms

Cargo Containment Systems

- definitions
cool-down 32.4
design chapter 33
gas carriers 33.1
independent tank type
membrane type 33.1
pressure drop 32.4
total arrangement for containing cargo 33.2

Cascade Reliquefaction Cycle

- definitions
condense cargo vapours 31.5.2
ethylene 27.2.1
heat exchangers 27.2.1
methane 27.2.1
propane 27.2.1
pure refrigerant cascade process 27.2.1
refrigerant compressor 27.2.1; 31.5.2
simplified Figure 31.13

Cathodic protection

- definitions
anodes in cargo tanks 4.7
hull/jetty 17.5.2
use during tanker-to-tanker transfers 11.9.5

- Cavitation
- definitions
 - centrifugal pump 32.7.4
 - flow rate 31.2
 - impeller 31.2
 - minimum head of cargo 31.2
 - pump 31.2
- Certificate of Fitness
- definitions
 - gas codes 32.5.1
 - guidance 32.5.1
 - particular grades of cargo 31.2
 - pump design 31.2
 - stability conditions .32.5.1
 - survival requirements 32.5.1

Communications

Chapter 22

- bunkering 25.2
- closed circuit television 4.4.3.2
- enclosed space entry 10.5
- equipment 4.8; 22.1.1
- language difficulty 22.1.2
- mobile telephones 4.8.6
- paggers 4.8.7
- pre-arrival 16.1; 22.2
- pre-berthing 22.3
- procedures 22.1.2
- pumproom entry 10.10.2
- radio 4.8.2
- satellite 4.8.2.3
- tanker to barge 11.9.2
- tanker to ship 11.9.4
- telephones 4.8.5; 22.1.1;
- terminal emergency 20.2.3; 20.4
- UHF/VHF 4.8.2.2; 22.1.1; 22.1.2
- vapour emission control 11.1.13.10

Compression Ratio

- definitions
- compressor discharge temperature 31.5.2
- inter-stage cooling 31.5.2
- two-stage cycle 31.5.2

Condensate

- definitions
- dryness fraction 27.21.2
- enthalpy 27.21.2
- extracted 27.2.1
- liquid 27.15
- NGL 27.2.1
- raw feed gas 27.2.1
- reliquefaction 31.1.1; 32.6; 32.8
- reservoirs 27.2.1
- vapour 32.5.2; 32.6

Contractors

- management of 9.7

Craft alongside

- see Alongside, Boats alongside

Critical Pressure

- definitions
- critical temperature 27.14

liquid state 27.14

Table 27.5

Critical Temperature

- definitions
- critical pressure 27.14
- gas 27.15
- physical properties Table 27.5
- pressures 27.14

Cryogenics

- definitions

D

Dalton's Law of Partial Pressures

- definition 27.19
- vapour pressure of liquid mixtures 27.19

Dangerous area

- definitions
- description of 4.4.2
- electrical equipment in 4.4
- work permits 19.1.3
- see also Area classification, Hazardous area

Dangerous goods

- Definitions

Deballasting

- see Ballast

Deck cargo

- carriage of 12.5.8

Deck water seal

- correct function 7.1.5.2
- freezing of 7.1.11.3

Deepwell Pump

- definitions
- booster pump 31.8
- cool-down 31.2; 32.4

- gas carriers 31.2
 - loading 31.2
 - pump performance curve 31.2; Figure 31.3
 - typical Figure 31.6
